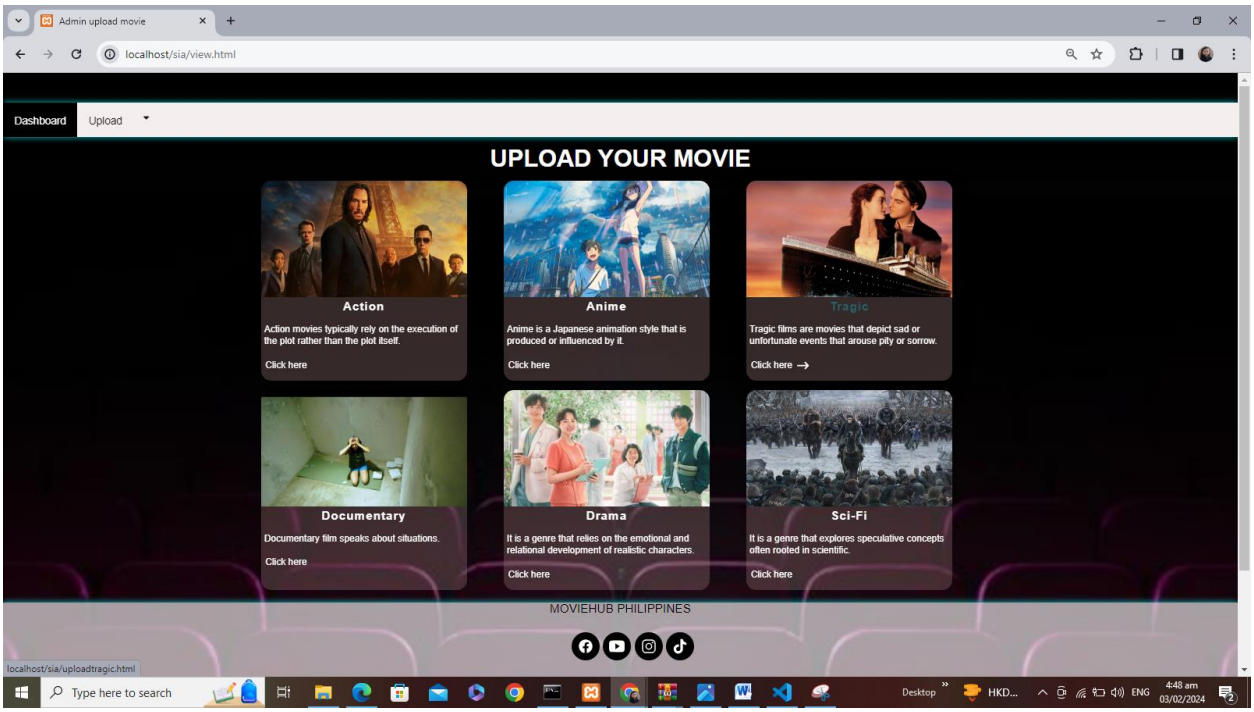
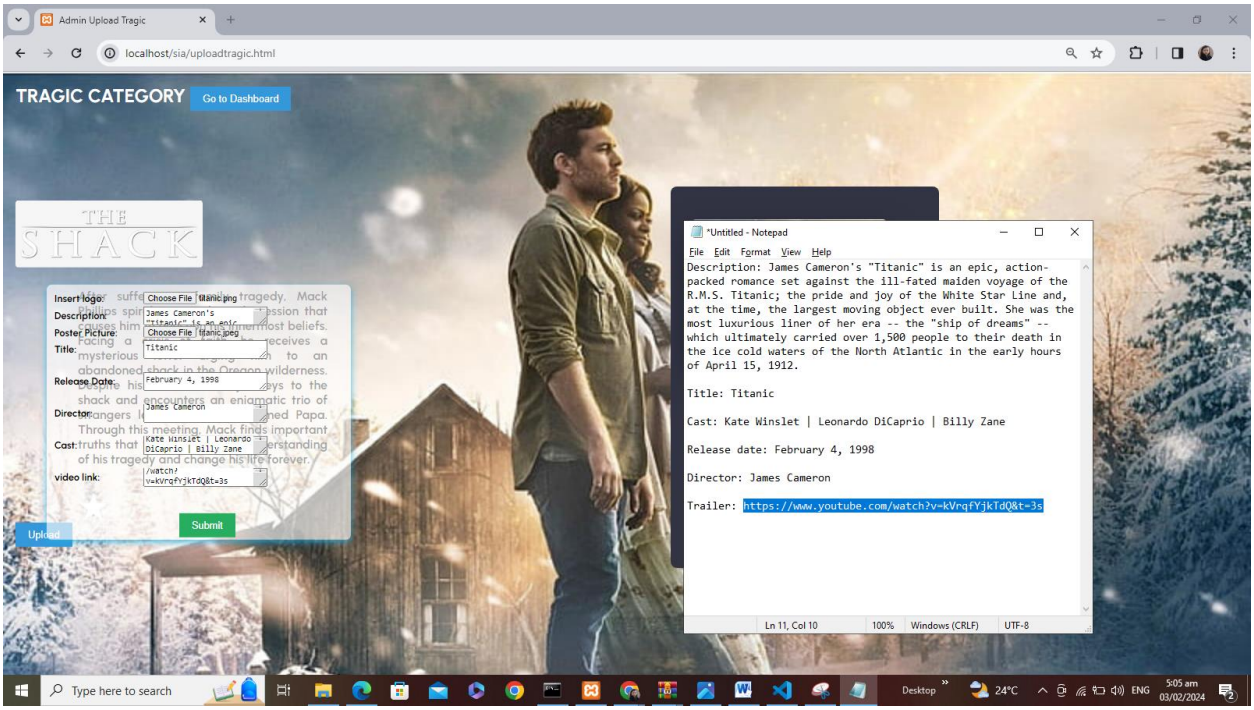
Here’s how does the system work:

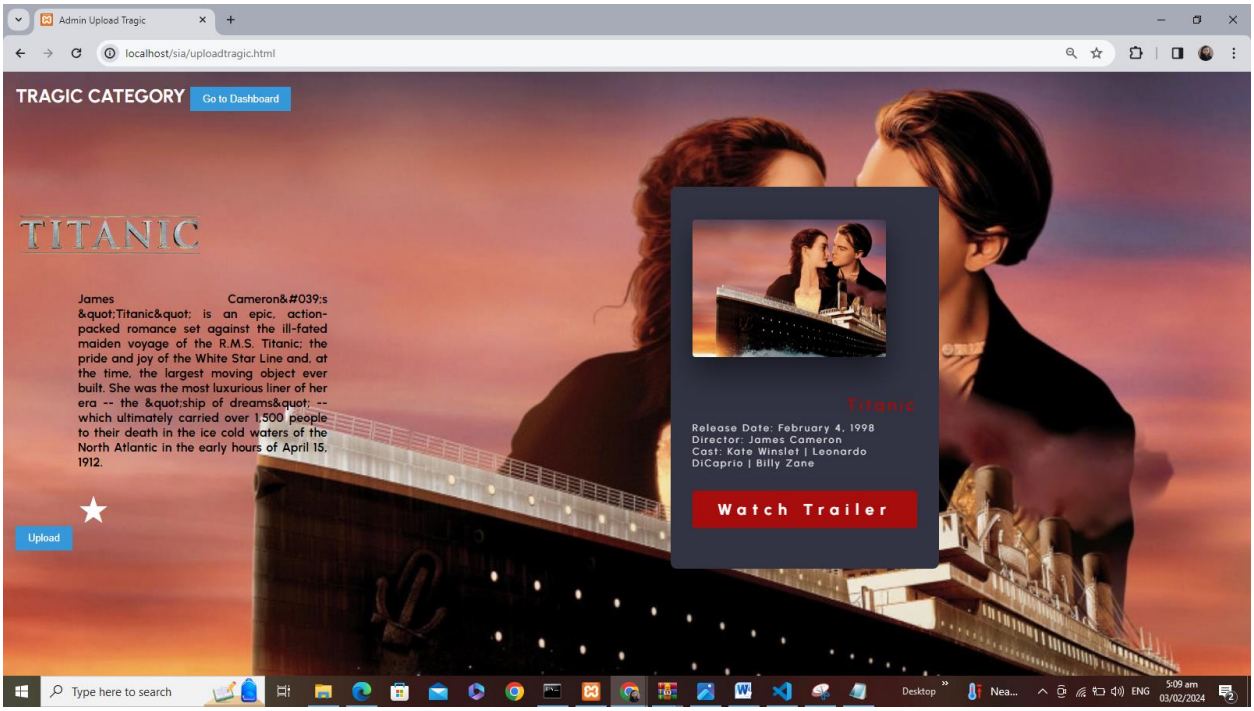
ADMIN’S POV (UPLOADING NEW VIDEO IN TRAGIC CATEGORY):



Before Uploading: As you can see, the data and ready to upload including movie logo, description, poster picture, title, release date, director, cast, video link (I chose **Titanic movie** to be inserted)

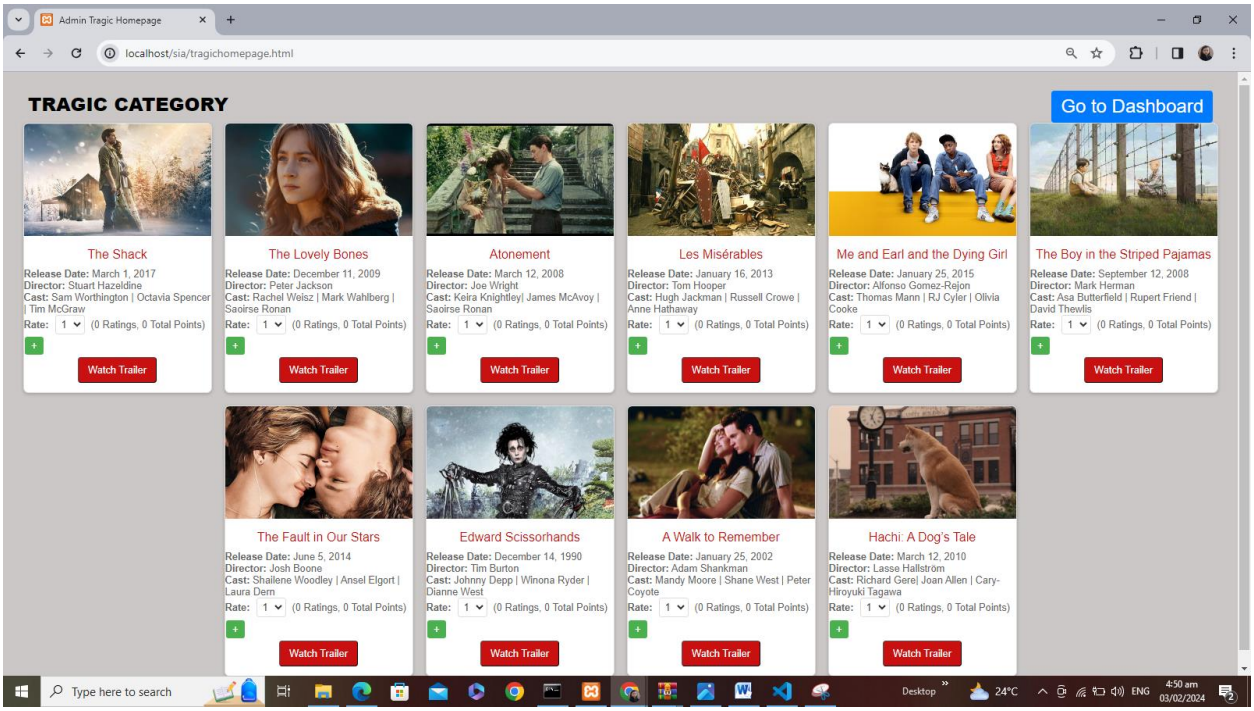


After Upload: The data is generated into cards, setting different data saved from database sia_db and fetched to display new data into same format and created template:



ADMIN POV in Tragic Category list:

(BEFORE):



(AFTER): Here the Titanic video is already updated and generate a new card in Tragic category:
